Whitefield, P. D., 53

Zipp, G. L., 33

SUBJECT INDEX TO VOLUME 10

Effect of additive adsorption on crystal growth and morphology, 49
Electrostatic separation of ultrafinely ground low-rank coals, 73
Experimental determination of the power requirements for ultrafine grinding and drying of low-rank coals in a fluid-energy mill, 171

Field sampling of jet exhaust aerosols, 53

Gas holdup in baffled bubble columns of dilute slurries of fine powders and viscous liquids, 155

Hybrid bin-moment model for aerosol nucleation, 65

Line/pseudo-line tension in three-phase systems, 1

Nucleation and crystal growth effects on particle characteristics, 33

Particle size analysis for ofloxacin, prednisolone acetate, and an ophthalmic suspension containing the ofloxacin/steroid drug combination, 37
Particle size distribution study of lanthanum-doped yttria powders by SEM-image analysis and laser light-scattering methods, 91
Pneumatic transport of dry ultrafine coal and analysis of pressure signals, 21
Processing and fracture toughness of sintered fiber reinforce ceramic matrix composites, 133

Removal of iron from kaolin ores using different microorganisms. The role of the organic acids and ferric iron reductase, 203

Spinning fibers from powder suspensions, 109
Statistics of continuous particulate measurement, 183

Ultrafine oxide powders produced by rapid thermal decomposition of precursors in solution, 143

Wall deposition of small suspended particles in a turbulent channel flow, 211

Yttrium aluminate ceramic fibers via preceramic polymer and sol-gel routes, 121
